ANALEXfdMplus

Ferrous Debris Monitor

ENGINEERING YOUR SUCCESS.

The ANALEXfdMplus is a highly accurate instrument designed to measure the contamination of an oil sample with ferrous wear metal particles.

What's new

The ANALEXfdMplus utilises a novel sample adaptor system to measure from any of the following sample media;

- 50ml Bottle
- 10ml Syringe
- 5ml Syringe
- 5ml Test Tube
- 4ml Grease Pots

The ANALEXfdMplus measures un-combined ferrous wear debris in oil or grease samples taken from a variety of types of machinery. Suitable for field and laboratory use, the ANALEXfdMplus provides you with the ability to successfully monitor your equipment, preventing costly machinery downtime.

Contained in a fully portable case, it's rugged design is ideal for testing and analysing oil samples both in the laboratory or in the field. Supplied with an optional 12 V converter, it is ideal for use in remote locations where full laboratory analysis is not possible. Samples may be presented for measurement in a variety of media, offering you full flexibility of use. Ferrous debris is measured directly from the oil or grease in the sample container, providing you with a quick, simple and clean method of analysis.

Data from each test is stored in the internal memory, which may then be transferred to a host PC via an RS232 interface. Data can then be fully analysed and trends easily monitored by importing into a database.

Features

Supplied with:

Calibration and Check Standards, Power Adaptor, RS232 Connector, Sample Adaptors, Range of Sample Media.

Data entry

Data entry is via a simple and intuitive touch pad screen, with full alphanumeric keypad and backlit graphics display, for clear user prompts and easy viewing of results. The following parameters can be recorded:

- Automatic date and time linked to each equipment or sample number.
- Equipment number or identification.
- Sample number or identification.
- Lubricant Hours (0 - 999999 hrs).

The results are shown in a tabular display and in graphical format to enable trending by machine or equipment number.
