

# PRODUCT RANGE

## COOL-CARE®

Very small air-cooled recirculating chiller. Ideal for small demand cooling such as HPLC, water baths, electrophoresis etc.

100% water saving vs. running tap water. Temperature setting as required (factory set 20°C). Virtually silent. Easy to use and a low price.

- Very small footprint and size
- Virtually silent
- Economical

**PLEASE NOTE;**  
When ordering the COOL-CARE® we need to know the real required supply temperature.

## COOL-CARE®

| Technical data             | COOL-CARE®      |
|----------------------------|-----------------|
| Temperature range °C       | 5 to 25 °C      |
| Cooling power @ 20 °C      | 180 W           |
| Pump pressure              | 10 l/min        |
| Pump power                 | 0.15 bar        |
| Ambient max. °C            | 28 °C           |
| Dimensions mm (LxWXH)      | 290 x 450 x 270 |
| Tank Size                  | 0.8 l           |
| Weight kg                  | 15 kg           |
| Temperature stability ± °C | 2               |
| Connections                | 3/8" quick lock |

**Options available:** Temperature range to 0 °C; temperature stability ±0.1 °C, stronger pump 24 l/min and 0.4 bar.
